O-Zgedney 4" Square Boxes, Extension Rings and Covers Appleton™ and O-Z/Gedney™ metallic 4" square boxes, extension rings and covers are widely recognized for quality, selection and ease of installation. They may be used as a junction box or a device box for switches, receptacles, GFCIs, etc. Manufactured of durable materials with consistent construction means easy installation, making all ...If you have entire fields that need mowing or you want to clear out pathways in overgrown areas, Swisher's Finish-Cut Mowers are made for large-sized mowing jobs. Enjoy professional-grade power and functionality with a size that's perfect for the kitchen counter. Our Pro-Elite Vacuum Sealer uses a heavy-duty double-piston pump and deep vacuum chamber, ensuring airtight seals that keep food fresh up to five times longer than traditional methods. Touch-pad controls provide three sealing levels and two vacuum options. Managing Microbes to Avoid Spoilage Microbial contamination and its consequences are major threats to wine quality. Controlling the growth of microorganisms during the winemaking process is vital to successful fermentations, wine stability and quality.
