Corrosion on your newly manufactured products or even during production can have a serious impact on the efficiency of your business. To prevent this it is necessary to use corrosion protection that forms a barrier between the metal substrate and the corrosive elements in the environment (e.g. oxygen, humidity, salts and temperature). Alconox, Inc. user manual offers guidance on COP & CIP cleaning, validation, ultrasonic cleaning & more for all detergents - Alconox, Liquinox, Tergazyme, et.al. This article is designed to assist those responsible for either drafting corrosion protection specifications, or as contractors with a requirement to meet that which is specified. *Electrode potentials in left column are from Evans (1963:end papers); potentials in the right column are from Hunsberger (1974:D120-125). As a blanket explanation for the corrosion of different metals in a shipwreck in salt water, the large galvanic cell metaphor and the electromotive position of the metals have been overused and are not completely understood. The large mass of different ...
