Manual Muscle Testing Grading Chart Florence Kendall.Apr 7, 2019- Manual Muscle Testing (also known as MMT) involves measuring the capabilities of a patient or test subject to apply a force using particular muscle groups. See more ideas about User guide, Manual and Muscle groups.Trace Grade: In the supine position, a contraction can be felt in the lateral abdominal muscles as an effort is made to elevate the pelvis laterally or adduct the arm against resistance, but no approximation of the thorax and the lateral iliac crest is noted. RECORDING GRADES OF ABDOMINAL MUSCLE STRENGTHSidelying with test limb superior to the supporting limb. Lower limb can be flexed for stability. Hold test limb in about 90° of knee flexion with the hip in full extension. Position of Therapist: The therapist stands behind patient at knee level. One arm cradles test limb around thigh with hand supporting underside of knee. The other handMuscle strength can be assessed by a number of methods: manually, functionally or mechanically. The Oxford Scale. The Oxford scale is commonly used by physiotherapists to manually assess muscle strength. According to the Oxford scale, muscle strength is graded 0 to 5. The grades are summarised below: Flicker of movement
